BOT COMPOSER VS POWER VIRTUAL AGENT

BOT COMPOSER

POWER VIRTUAL AGENT

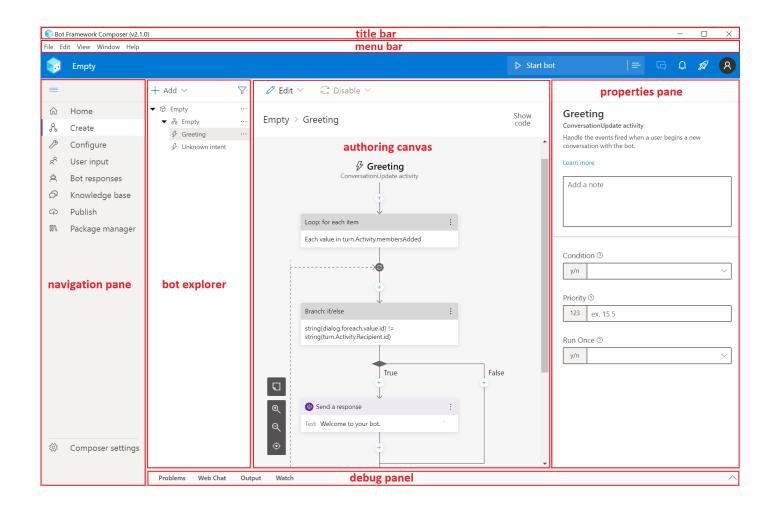

Bot Composer

Bot Composer

Bot Framework Composer, built on the Bot Framework SDK, is an open-source IDE for developers to author, test, provision, and manage conversational experiences. From Composer, you can test your bot and publish it to Azure.

Composer is a visual editing canvas for building bots.

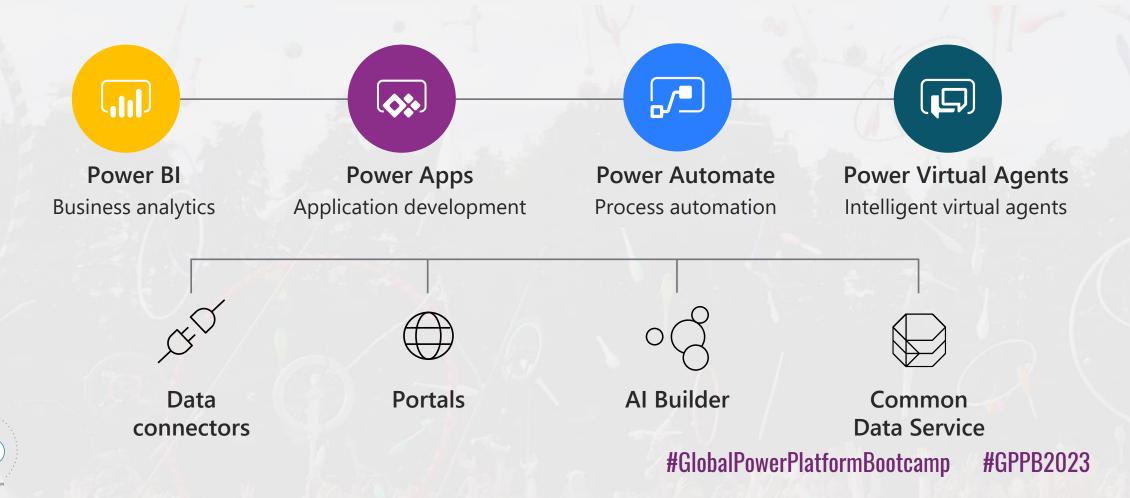

Power Virtual Agent

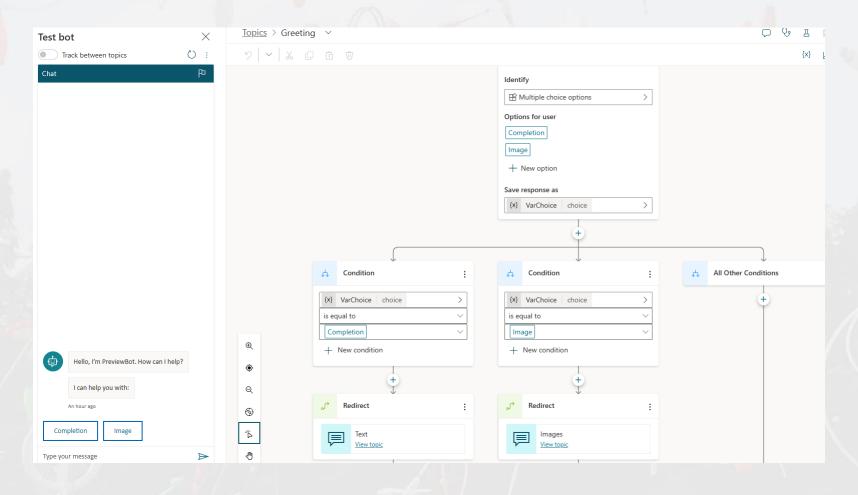

Microsoft Power Platform

The low-code platform that spans Office 365, Azure, Dynamics 365, and standalone applications Innovation anywhere. Unlocks value everywhere

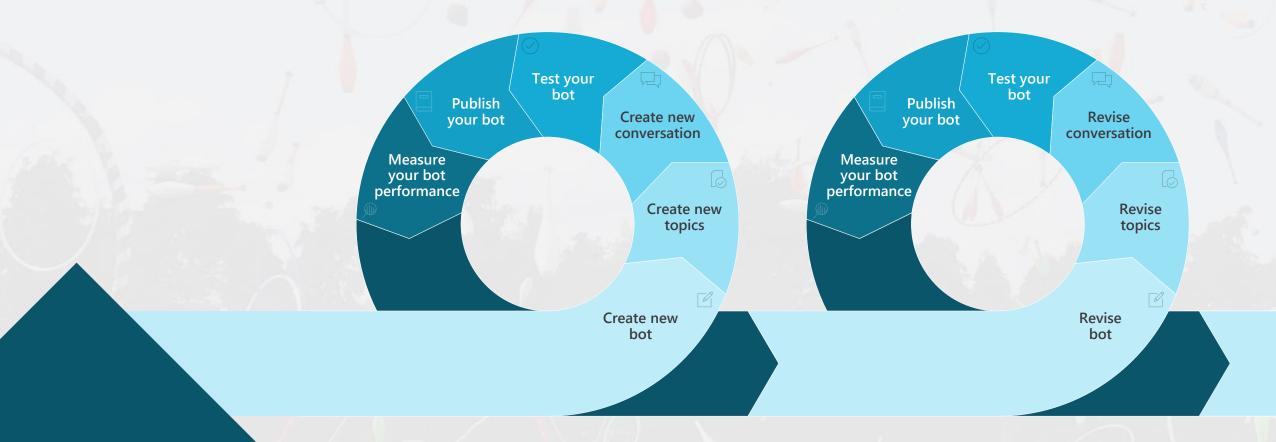

Power Virtual Agent

Power Virtual Agents lets you create powerful chatbots that can be created with a guided, no-code graphical interface - and without the need for data scientists or developers.
